

## Web

1. First I loaded up the site. Next I looked at the cookies on the website by right click, inspect element, then the Application Tab.

I was playing around with Edit this cookie and I somehow deleted all the cookies via a filter and now I can't see anything lol. I refreshed the page and then the 'you\_have\_flag' name with the value 'false' reappeared. I used EditThisCookie and changed the value to 'true' and then this appeared:

Application											
Filter											
<input type="checkbox"/> Only show cookies with an issue											
Name	Value	Do...	Path	Exp...	Size	Http...	Sec...	Sam...	Sam...	Prio...	
you_have_flag	true	sup...	/	Ses...	17	✓					Med.

← → ↻ ⚠ Not secure | supersecure.store:9998

2. The status codes all appear to be 303 status which is the redirect HTTP Status. The methods all appear to be GET requests.

# ^	Host	Method	URL	Params	Edited	Status	Length	MIME type	Extension
1	http://supersecure.store:9996	GET	/favicon.ico			303	953	HTML	ico
2	http://supersecure.store:9996	GET	/			303	953	HTML

16	http://supersecure.store:9996	GET	/TPHKQHOZPB.html			303	1779	HTML	html
17	http://supersecure.store:9996	GET	/favicon.ico			303	953	HTML	ico
18	http://supersecure.store:9996	GET	/SHJMMCNBVX.html			303	1774	HTML	html
19	http://supersecure.store:9996	GET	/favicon.ico			303	953	HTML	ico
20	http://supersecure.store:9996	GET	/final.html			303	187	text	html
21	http://supersecure.store:9996	GET	/favicon.ico			303	953	HTML	ico

Headers and responses don't have anything interesting either so not sure where the flag is.

- First I visited the site. Next, I looked at the inspect element code, html, and the cookies of the website. There appeared to be nothing there. Then, I noticed the 'username=' in the URL

⚠ Not secure | supersecure.store:9995/index.html?username=blank

and tried appending the following on in place of 'blank'

- 'instructors'
- 'username'
- 'Dave'
- 'John'
- 'Alden'

Alden succeeded

**Welcome, Alden!**
